SCOPUS Citation Count Instructions

Follow these directions to find citations counts divided up by year for an author in Scopus

1. Logon to Scopus using these directions.
2. Click on Author search.
3. Enter author information (Last name, first name and affiliations if your name is common).
4. In the results page check the box(es) of the correct author.
   You can click on the number of publications (in this case 167) to make sure these publications are correct or wait until you get results and then delete as needed.
5. Click View citation overview to get the full list of publications.
Options on this page include:

- **Date range**
- **Exclude self citations of selected author** (the author that you just searched)
- **Exclude self citations of all authors**
- **Exclude citations from books**
  - Click Update if any changes are made.
- **Sort on** (located to the right of the page): set to Date (newest), Date (oldest), Citation count (descending), Citation count (ascending)
7. To get a printout click on Export or Print in the top right side of the page.
